SUMMARY

Hey, I'm Ashwani, a Computer Science Geek and full-stack developer who thrives on building and shipping solutions that truly matter. I could be an excellent fit if you seek a developer whose passion is inseparable from their craft. My approach is defined by deep product ownership I don't just deliver to specification; I relentlessly refine, constantly seeking out opportunities to elevate the quality and user experience. If you're looking for a developer who builds with heart, technical excellence, and an unwavering commitment to the final outcome

EXPERIENCE

HIBISCUSTECH – Full stack Engineer - Building AI for Complex Decisions (Psyplay.io) ([link](#)) **May 2026 - Present**

Building and maintaining scalable end-to-end web applications using Next.js on the frontend and Go for backend services and core algorithms. Designing and optimizing PostgreSQL databases while improving development workflows through CI/CD automation with GitHub Actions. Collaborating closely with the team to deliver high-performance, reliable, and production-ready solutions.

NEXO –Full Stack Engineer - Marketplace for second hand application **Nov 2025 – April 2026**

Developed the first version of the landing page with a more interactive and polished experience compared to the previous demo version. Built dedicated dashboards for both buyers and sellers to manage listings, bookings, revenue, and order analytics efficiently. Integrated a real-time chat system using Supabase Realtime Channels to enable seamless communication without additional infrastructure costs.

EDUCATION

Rajarshi School of Management and Technology

[portfolio](#)

Bachelor of computer Application 2024-2027

UP, India

PROJECTS

Memai | Python, OpenAI, PostgreSQL, Semantic Search, Vector Database, RAG, Graph DB, PyPI, Next.js, Typescript [Github](#)

A memory system for AI apps that builds context graphs from interactions. Extracts facts as connected semantic and episodic memories, enables intelligent retrieval, and powers contextual responses across conversations.

Claude-sub-agent | Typescript, Next.js, Shadcn, AI models, Supabase, bun.js

[Livelihood](#)

Claude Code's sub-agents are incredibly powerful, but discovering the right prompts for your specific framework or language can be challenging. We built Sub-Agents Directory to solve this problem.

Flowforge | Typescript, Trpc, Next.js, Shadcn, Inngeist, AI models

[Livelihood](#)

Flowforge is a workflow automation platform where you build flows visually, connect integrations, and run AI + API automations from one place.

Nexo | React.js, Supabase, Websocket, Sypescript, Node.js

[Livelihood](#)

A ecommerce for second hand items like car, bike, home, laptop, tablet etc. it has feature like u can chat one-o-one seller of the product. you can book the product y can even sell your items using this platform.

TECHNICAL SKILLS

Languages | C, C++, JavaScript, TypeScript, python

Frameworks/Libraries | Fastapi, Django, Next.js, React.js, Node.js, bun.js, Express.js, T3 stack, Tailwind CSS, Prisma, Selenium, BullMQ

Databases/Services | PostgreSQL, Firebase, MongoDB, Redis, AWS

Tools | Git, GitHub, Docker, Cursor, Claude code, codex

Architecture | MVC & Microservices
